SAFETY

The position of this Holler as absolutely asfe from disastreus explosion, economical in fuel, and as a thoroughly reliable, durable, practical, and efficient Steam Generator is fully established, as evinced by the sale of about One Hundred and Fifty Boilers, in sets of from 5 H. P., to 330 H. P., the sale, to many purchasers, of a second one after trial of the first, and by the experience of those who have used it. Its addy is self-wisedent, is not being built of any singerous materials, as large wrought iven plates, containing unseen defects, nor cast from, which cracks and gives way instantly, but being composed of the best Wrought Iron Boiler Tubes, tested to 500 lbs, pressure, water and steam inside of them, and having no large sheet iron shell to explode. Its co-comy of faci, and many other advantages, resulting from its sectional form, as lightness, low freight, facility of enlargement, etc., are equally evident upon examination. Its use secures the economy of high pressure without danger. In view of the thousands of victims maked or monitored by all the common forms of boilers, no humane man can affort to licent the risk of using a boiler in which such fearful results are possible. They are possible, and somewhat probable, in all shells boilers, the danger being inherent in the large dancter, and resay to devolop itself at any moment in an explosion. Roof's Safety Boiler offers absolute humanity from such results. Send for flustrated Pamphlet. Address ROOf STRAM ENGINE CO., Secondave, cor. Twenty-eight st. New York. LENGTH OF ROAD...... 117 5-100 MILES. TOTAL ISSUE OF BONDS \$2,000,000.

The bonds are limited to less than \$18,000 per mile,

and are secured by a First Mortgoge on the entire prop-

erty of the Company, which cost about \$40,000 per mile,

and which, we can say with the utmost confidence, will be worth soon after the completion of the road at least double its cost. The consolidation of this line with the Indianapolis, Crav fordsville and Danville Road places over two hundred miles under one management, and furnishes still further security tothe bondholders, these bonds having been assumed (a virtual guarantee) by the consolidated company under the name of the Indianapolis, Bloomington and Western Railroad Company. Thus is an east and west road, connecting with direct lines to Boston, New-York, Philadelphia, and Hallmore on the east, and with the Pacific Roads on the west. It runs through the richest and most populous district of Illinois, the local business of which will be more than sufficient tosustain it, while the through business (which will be limited only by the capacity of the road) must make it one of the best paying railway - in the country. The greater part of the road is now fleished, and the bal-

ance will be completed and thoroughly equipped by the first of January next. Over two-thirds of the loan has been taken by ac tual investors. We continue to offer, for the present, the balance at 95 and accrned interest in currency, at which price they pay about 10 per cent interest in currency-50 per cent more than Governments. The high premium which the stock of all the East and West roads in Illinois commands justifies the belief that the stock of this road will also soon sell

bond a valuable option. These bonds may be registered, if desired,
